

JACK MUOIO

EXPERIENCE

Annuities Service Representative

Prudential | New York, New York | June 2024 - Current

- Managed complex inquiries regarding annuity contracts, demonstrating high-level problem-solving and technical troubleshooting in a remote environment.
- Utilized internal databases and specialized software to track, resolve, and document client issues efficiently.
- Collaborated with colleagues to enhance service delivery strategies.

Frontend Development Intern

Frontend Simplified | New York, New York | May 2026 - June 2026

- Engineered dynamic UI interactions for enterprise application using React, enhancing static pages into fully interactive layouts.
- Implemented custom animation pipelines and transition lifecycles to optimize layout responsiveness.
- Ensured high-performance rendering across all modern mobile viewports through scalable component rendering loops.

Product Research Assistant

Inveniam | Pennington, New Jersey | May 2022 - August 2022

- Developed AI technology to interpret and structure data from financial statements and complex documents, enhancing data accessibility.
- Categorized and redacted critical documents for institutional clients, ensuring compliance and clarity in presentations.
- Streamlined research databases for easy access, improving research efficiency and response time.

PROJECTS

Screen Finder | React, JavaScript (ES6+), OMDb API, CSS3

- Built a dynamic media search web application featuring asynchronous data fetching and real-time state filtering.
- Optimized React component lifecycle architecture to ensure smooth state transitions and reliable layout tracking.

Roomify | TypeScript, React, Puter.js, Tailwind CSS

- Developed an AI-powered architectural visualization platform managing cloud-hosted rendering worker pipelines adapted from a JavaScript Mastery architecture pattern.
- Engineered asynchronous metadata state mechanisms and local synchronization to handle photorealistic 3D asset workflows.

Library | React, JavaScript (ES6+), HTML5, CSS3

- Built a dynamic e-commerce bookstore interface leveraging a structured mock API array to handle complex data mapping.
- Implemented localized state synchronization to drive real-time cart mechanics, quantity shifts, and nested page routing.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks & Styling:** React, Tailwind CSS
- **Backend & Platforms:** Firebase, Vite, Vercel, GitHub, Git
- **Methodologies & Tools:** AI Prompting, API Integration, UI/UX Principles
- **Soft Skills:** Creative Problem Solving, Teamwork, Adaptability

EDUCATION AND TRAINING

FES Institute Certificate of Graduation

Frontend Web Development
Frontend Simplified, Virtual

- Intensive program focused on Javascript and React for building production-ready web applications.
 - Mastered responsive design, asynchronous programming, and modern frontend architecture.
- June 2026

Bachelor of Science

Business
Lehigh University, Bethlehem, PA

- Double Major in Finance and Marketing with Minor in Psychology
 - Graduated with Honors
- June 2023
